Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-7, drawn to a tray with specific first area with single wall construction, classified in class 220, subclass 660.
- II. Claims 8-27, drawn to a tray with specific double wall construction with alternating first area, classified in class 220, subclass 643.
- III. Claims 28-40, drawn to a tray with specific sidewall column, classified in class 220, subclass 637.
- IV. Claims 41-47, drawn to a tray with specific cut out portion, classified in class 220, subclass 676.
- V. Claim 48, drawn to a tray with inward extending protrusion, classified in class 220, subclass 651

The inventions are distinct, each from the other because:

Each grouped invention is separate, independent and unrelated inventions and does not rely upon the other grouped subcombination for patentability. For example: the evidence claims are claims 1,8,28,41 and 48. For instant, group I does not rely the double wall of claim 8, the sidewall column of claim 28, the cut out portion of claim 41 and the protrusion of claim 48 for patentability.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

This application contains claims directed to the following patentably distinct species of the claimed invention: (1) Figures 1-10;

- (2) Figures 11-20;
- (3) Figures 21-30;
- (4) Figures 31-40;
- (5) Figures 41-50;

(6) Figures 51-60.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim appears to be generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Any inquiry concerning this office action will be directed to examiner Joseph Moy, (703) 308-1145. In order to reduce pendency and avoid potential delays, Group 3720 is encouraging faxing of responses in Office Actions directly into the group a (703)305-3579 or (703)305-3580. This practice may be used for filing papers not requiring a fee. It may also be used for filing papers which require a fee by Applicants who authorize charges to a USPTO deposit account. Please identify the examiner and the art unit at the top of your cover sheet.
